

# Magnetite day

## International symposium

**5 July 2022, Grenoble (France)**  
**ISTerre, Université Grenoble Alpes**  
**Killian amphitheater**

<b>Time</b>	<b>Speaker</b>	<b>Title</b>
09:00 – 09:30		<b>Welcome &amp; coffee</b>
09:30 – 10:00	Damien Faivre	<b>Formation Pathways of Biological and Synthetic Magnetite</b>
10:00 – 10:30	Tsz Ho Chiu	<b>Magnetite: Synthesis, Modification and Applications</b>
10:30 – 11:00	Alejandro Fernandez-Martinez	<b>Redox reactivity of nanomagnetite towards anionic radionuclides</b>
11:00 – 11:15		<b>Coffee break</b>
11:15 – 11:45	François Guyot	<b>Bacterial nanomagnetites as indicator phases of thermodynamic properties of complex biological media</b>
11:45 – 12:15	Kaifeng Wang	<b>Se(VI) and Re(VII) retention by magnetite</b>
12:15 – 13:30		<b>Lunch break</b>
13:30 – 14:00	Sylvie Begin	<b>Engeneering of iron oxide based theranostic nanoplatforms for cancer treatment</b>
14:00 – 14:30	Alain Laurent	<b>Uses of magnetic nanomaterials in the field of molecular diagnostics assays</b>
14:30 – 15:00	Camille Crouzet	<b>Applications of magnetite and ferrite nanoparticles: insights from a startup company</b>
15:00 – 15:15		<b>Coffee break</b>
15:10 – 15:45	Cecile Gautheron	<b>U and Th characterization in natural and synthetic magnetite: implication for the (U-Th)/He chronometer</b>
15:45 – 16:15	Kevin Rosso	<b>Structure and redox reactivity of titanomagnetite nanoparticles</b>
16:15 – 16:45		<b>Discussion &amp; concluding remarks</b>
